

CM30

Condenser Desktop Microphone

Description

CM30 is specially designed and made for various kinds of meeting, lectures, broadcasting, recording occasion, etc. It adopts high quality dynamic cartridge to make sure that the microphone has high sensitivity and good frequency response. It is shaking-proof conference microphone with switches (including built-in switches). It can be assembled or disassembled easily. It's designed to put on desk. It has strict audio transmission and can match different phantom powers. Its base is made from Integral die-cast metal, delicate and small-sized.

Features

- With full anti-interference
Anti - electromagnetic interference and anti-mobile phone interference help the microphone avoid whistling or noise from the microphone.
- With switch impact eliminated
Some special technology is applied for eliminating noise when switching on/off the microphone. And it also avoids damage to the microphone.
- With good frequency, high-fidelity
Applying a special high-quality heart-shaped and ultra-pointing to the microphone core, coupled with a reasonable electro-acoustic circuit to make frequency response more broad and flat, producing high fidelity, clear and charming voice.

Specifications

Model	CM30
Capsule Type	Condenser
Frequency response	30Hz-20kHz
Sensitivity	-45dB±2dB
Output impedance (ohms)	75Ω
Polar Pattern	Uni-Directional
Working voltage	phantom 48V
Micro tube length	455mm
Base size (w * d * h)	115 * 138 * 40 mm
Anti-interference	Anti-mobile phone, anti-electromagnetic
Net weight	1.1KG
Gross weight	1.9KG
Packing size	450x175x75mm
