

DSP102L

2.5" 10W Ceiling Speaker with Cover

Description

The surface is coated with a fashionable matte finish paint, featuring a passive single radiator on the back and a fully enclosed sound chamber. Its compact and exquisite design delivers high-fidelity audio quality. The radiator can meet the playback effects of conventional music genres, providing excellent performance for 2.5-inch ceiling speakers in terms of power, making it suitable for vocal and light bass music playback.

Features

- With rear cover (plastic)
- Pure resistance (8Ω)
- Equipped with a radiating basin at the rear
