

DSP350F Outdoor Directional Speaker

Description

The DSP350F outdoor directional speaker is a premium choice for directional sound reinforcement systems. Featuring two 8-inch bass units, a midrange unit, and a tweeter unit, it guarantees superior audio clarity and depth. Its robust directionality and extended sound transmission distance ensure focused audio coverage, minimizing disturbance to surrounding areas. Moreover, its all-weather design ensures reliable performance in all outdoor conditions, making it the ideal solution for playgrounds and beyond.

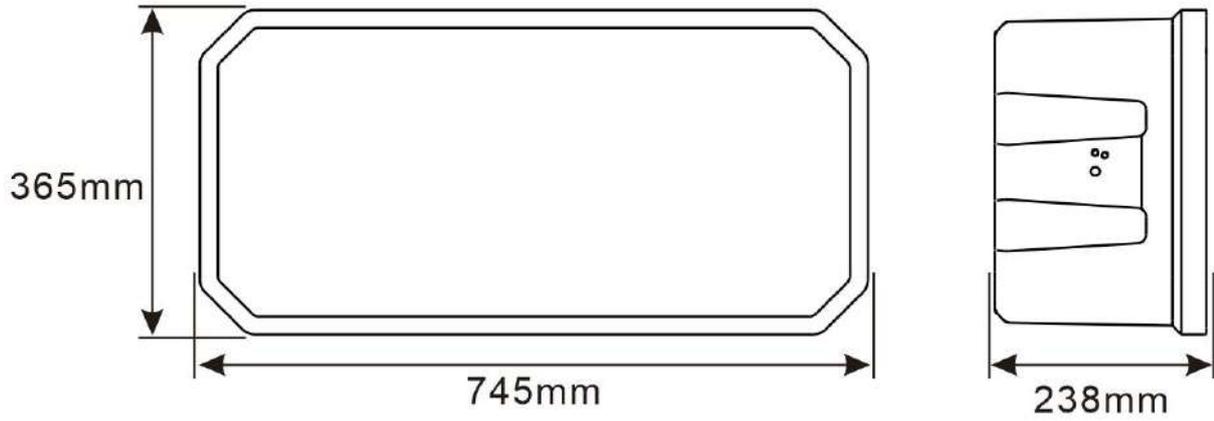

Features

- Suitable for use in public broadcasting and background music
- Clear and bright sound, providing a high-quality auditory experience
- Features strong directionality, with a long sound transmission distance, achieving directional sound transmission without disturbing the public
- All-weather design, suitable for outdoor venues such as playgrounds and squares

Specifications

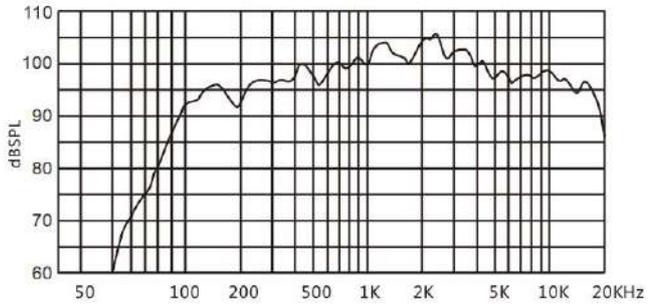

Model	DSP350F
Speaker Unit	Bass Unit: 8" × 2 , Midrange Unit: × 1 ,Tweeter Unit: × 1
Rated Power (RMS)	Bass Unit Power:100W, Midrange Unit Power:100W, Tweeter Unit Power:20W
Working Voltage	100V
Frequency Response Range	100Hz~18kHz
Product Size (W×H)	745×365×238mm
Directional Angle	≤±15°

Product Information

Frequency Response Characteristics

(dB SPL, 1W, 1m)

Distortion Characteristics

(THD < 5% 1W, 1m, 100Hz-10kHz)
