

MAG6350

Outdoor Network Horn Speaker

Description

The product is a network active horn speaker supporting network broadcast intercom system and the standard SIP protocol. Using the ABS plastic for the speaker box, it is durable and can be used outdoors for a long time. With wide sound diffusion angle, easy to install, it can realize super reproduction of voice and music.

Features

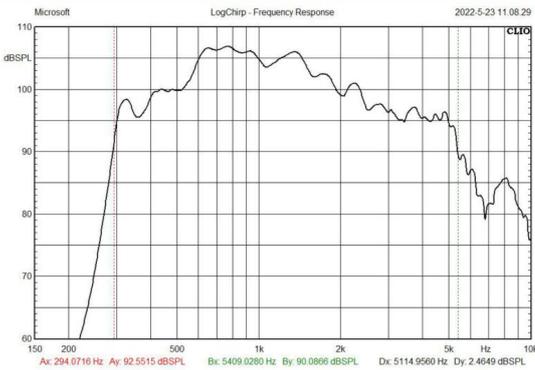

- With SIP intercom, and network broadcast function.
- 10/100M self-adaptive, support DHCP/static IP.
- Support the existing DSP9000 and MAG6000 network public address system.
- Support WEB background management.
- Adopt high-strength ABS material.
- With clear and delicate treble for high-quality voice playback effect.
- With built-in digital amplifier, low distortion, low noise & wide dynamic range.
- With self-protection functions, including temperature protection and short circuit protection.
- Can play the background music, emergency paging and alarm signals from the host system.
- Overall waterproof design and passed IP65 test.
- All-weather design, suitable for long-term outdoor use.

Specifications

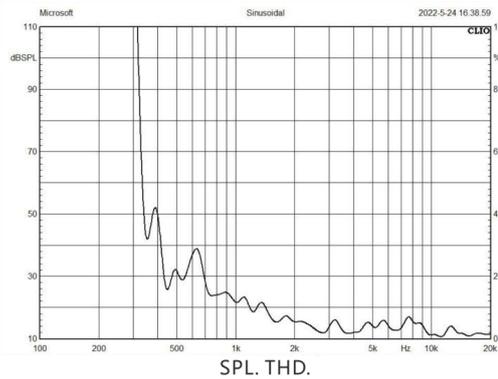

Model	MAG6350	
Amplifier OUT	Rated Power (RMS)	50W/4 Ω
	SNR	≥81dB
	Frequency Response	100Hz-16KHz

Speaker	Input Sensitivity	-10dB
	Sensitivity	102dB ± 3dB
	MAX. SPL.	120dB ± 2dB
	Frequency Response	350Hz-5KHz
Power	Voltage	DC24V 2.5A
Others	Network Port	RJ45 (10/100M)
	Power Interface	DC24V 2.5A
	Package Dimensions	445×280×350
	Machine Dimensions	400×235×320
	Gross Weight	4kg
	Net Weight	3kg

Frequency Response
(dB SPL, 1W, 1m)

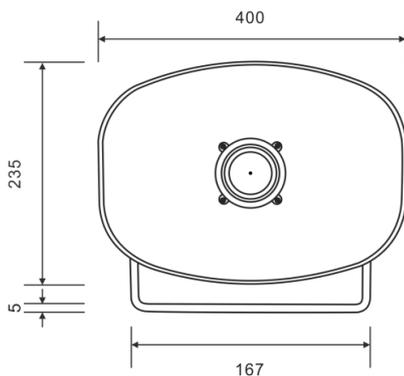

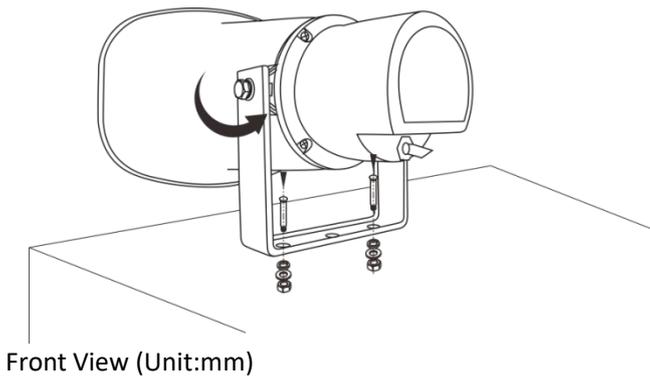

Distortion
(THD < 5% 1W, 1m, 350Hz-5kHz)

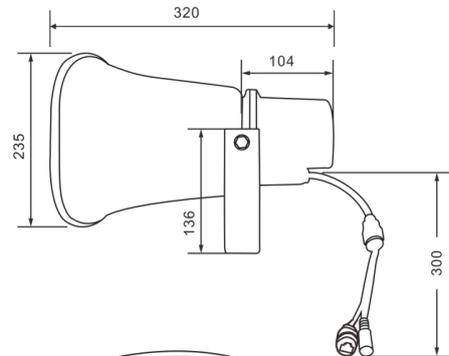

Installation Instruction

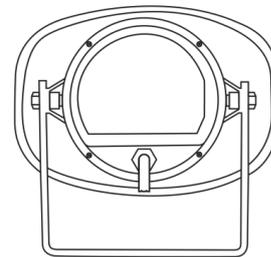

The bracket can support multi-angle rotation. First tighten the nut to fix the bracket, and then secure the screws into the mounting holes and fix them on the wall.
